**Cirrus Solutions Releases Newest DMS Module**  
*Document Management Now Fully Integrated*

**Palm City, FL:** Cirrus Solutions announces the release of its newest module within their Dealer Management System. This module provides for full document management and storage within the DMS.

“We are thrilled to be able to release this newest module for document management that follows our core philosophy of full integration in a user friendly, cloud based and modern Dealer Management System” says Patrick West, Owner and founder for Cirrus Solutions.

The new Document Manager is fully integrated into all the modules within Cirrus including Deals, Accounting and Service. It provides for:

- Easy uploading or scanning into the system
- Automatic document indexing
- Red Flag Compliant with role based permission
- Configuration to meet individual dealer needs

**Cirrus Solutions**, Palm City, FL is a dealer management software created by dealers for dealers. The fully integrated, comprehensive Cloud-based platform allows dealers to streamline their processes, understand business profitability and drive more sales. The modular system integrates with external programs and allows dealers to manage inventory, deals, service, parts accounting and more. The integrated website automates presentation of inventory on the web simply by adding units into the system. Call today for a free demonstration. 772.223.1294 [www.cirrussolutions.com](http://www.cirrussolutions.com).
