Cirrus Solutions, a leading provider of dealership-focused business solutions, announced today the expansion of its accounting services division in response to significantly higher-than-anticipated demand from dealerships nationwide.

What began as a limited offering has quickly evolved into a core service line, prompting Cirrus to add additional accounting specialists to support dealership clients with both routine and complex financial tasks. The expanded team will assist with day-to-day accounting functions as well as monthly, quarterly, and annual financial reporting.

Cirrus accounting services now include a comprehensive range of support—from running accounts payable (AP), reconciling daily deposits, posting sales, and managing inventory floorplans, to completing bank reconciliations, preparing income statements, and performing full reconciliation of all balance sheet accounts.

“The demand for accounting services was greater than we anticipated,” said Laura West, Controller, at Cirrus Solutions. “What we originally thought would only be a temporary service has become something dealerships are actively seeking out from us. Helping our dealers succeed has always brought me the most satisfaction, and I look forward to working with even more dealers to help them realize their full potential.”

This move reflects Cirrus Solutions’ ongoing commitment to helping dealerships grow through tailored, strategic support. By expanding its accounting capabilities, the company aims to provide a seamless, high-touch experience that empowers dealers to focus more on their operations and less on the back office.
