Cirrus Solutions Releases Keystone Automotive Integration
Check Availability and Order Parts Directly

Palm City, FL: Cirrus Solutions announces the release of its newest integration feature within their Dealer Management System. Dealers can now check availability and order parts directly from the Cirrus interface.

“This new enhancement further expands our partner integrations and allows dealers to check and order parts without ever leaving our system. Our core philosophy of full integration in a user friendly, cloud based and modern Dealer Management System continues to evolve with this addition.” says Patrick West, Owner and founder for Cirrus Solutions.

The new feature works within our Service and Parts Modules to allow for checking of inventory via Keystone Automotive for parts from:

- NTP
- Stag
- Coast

Users complete these functions directly from the Cirrus DMS and improve their processes and speed of work effort. Enhancements include configuration for special shipping directions and methods as well as directing which warehouses the order will be drawn from for faster delivery based on your location.

Cirrus Solutions, Palm City, FL is a dealer management software created by dealers for dealers. The fully integrated, comprehensive Cloud-based platform allows dealers to streamline their processes, understand business profitability and drive more sales. The modular system integrates with external programs and allows dealers to manage inventory, deals, service, parts accounting and more. The integrated website automates presentation of inventory on the web simply by adding units into the system. Call today for a free demonstration. 772.223.1294 www.cirrussolutions.com.
